LMS e-Learning Implementation Podcast Transcript #27 *'08 Holiday Wrapup.*

[music]

Announcer: SyberWorks podcast. Learn any time, any place.

Mary Kay Lofurno: Welcome to the SyberWorks e-Learning Podcast Series, where we look at various topics in e-learning. SyberWorks specializes in custom e-learning solutions, learning management systems, and e-learning development for corporations, governments, and non-profits. My name is Mary Kay Lofurno, and I'm the Marketing Director here at SyberWorks, and I'm your host.

We've had a great time this year on the SyberWorks e-Learning Podcast Series. It's been a lot of fun. We've discussed some interesting and useful topics such as instructional design techniques, using graphics in e-learning development, online test creation, and using Flash in e-learning content development.

We had Guy Wallace, a certified performance technologist and president of EPPIC, Inc., come on the show twice to discuss two of his popular e-books, "TND Systems View" and "Management Areas of Performance."

We also had two different podcasts on issues relating to learning management system deployment; such as guidelines for developing LMS data exchange interfaces, and the relationship and interactions between courses, learning events, competencies, and job roles in talent management scenarios.

And let's not forget our visit with Stephanie Norton of 21 CFR Consulting, LLC, who would take a hard look at the requirements for FDA 21 CFR part 11 in regards to compliance training and learning management systems validation.

You can find these podcasts and their accompanying transcripts in the SyberWorks Media Center on our website.

This is Mary Kay Lofurno, Marketing Director at SyberWorks. We at SyberWorks want to thank you for listening to our e-learning podcast series, and wish you a happy holiday and a safe new year. Talk with you next year!
